```java
public class MyClass {

    Integer [] x;
    Integer y;
    String [] s;
    Boolean b;
    Compunter c;

    public MyClass (Integer b) {

    }

    public void method (String p) {
        Integer x;

    }

    public Integer methodI (Integer s) {
        Boolean y;

    }

    public Boolean methodB (String q) {
        Boolean x;

        return x;
    }
}
```
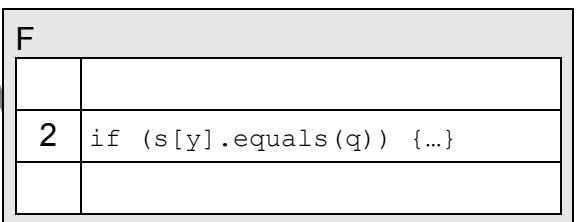

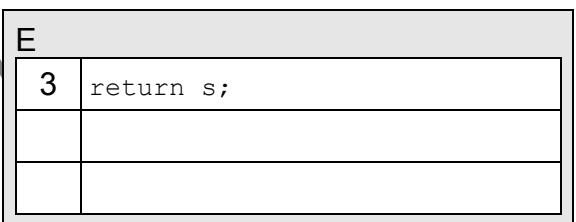

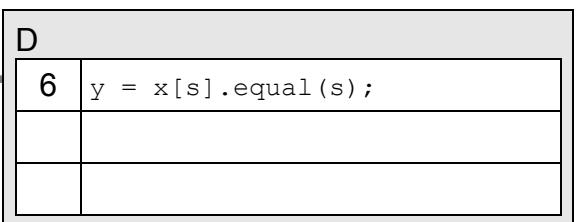

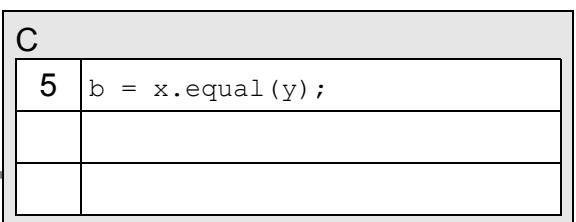

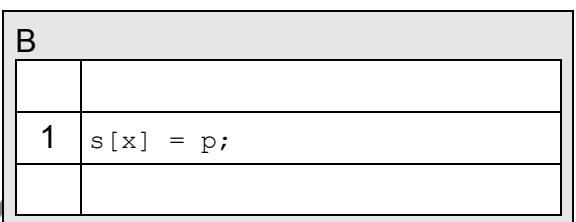

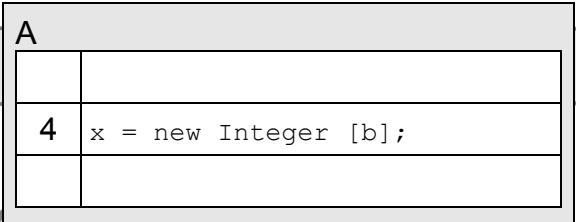

A	
4	`x = new Integer [b];`

B	
1	`s[x] = p;`

C	
5	`b = x.equal(y);`

D	
6	`y = x[s].equal(s);`

E	
3	`return s;`

F	
2	`if (s[y].equals(q)) {…}`
